Bandar Baru Bangi, 43650. Selangor

SKILLS

Expert

- Microsoft Office
- Ubuntu and CentOS Stream (OS)
- Technical Documentation
- Server Administration
- Infrastructure Troubleshooting

Intermediate

- Proxmox
- Cloud (TMCloud and AWS)
- Docker, Composer
- MySQL, PostgreSQL
- Linux Networking
- VPN and Routing
- Security Groups, NACL and SDN
- WAF, ALB, VPC, Peering and etc
- Kubernetes Infrastructure Support
- Hardening and Vulnerability
- Automation CI/CD Infrastructure Pipeline

Basic

- pfSense
- Laravel, Symfony
- Java, Python
- Hyperledger Fabric
- Prometheus, Grafana
- Nessus

EDUCATION

UNIKL MIIT, KAMPUS KOTA, KUALA LUMPUR

Bachelor of Software Engineering | July 2019 - Dec 2022

CGPA : 3.55

MARA PROFESSIONAL COLLEGE, SERI ISKANDAR

HND Business and ICT | Dec 2017 - Mar 2019

CGPA: 3.83
(Second Class Upper)

Foundation in Business | July 2016 - Oct 2017

CGPA: 3.09

PROFILE

As a dedicated IT professional, I've built a solid foundation in both the academic and professional realms, with hands-on experience in infrastructure and blockchain technologies. Starting with an impactful internship, I've progressed through roles that sharpened my tech skills and ready to add value to a team and advance a company's tech journey. Dedicated to continuous learning to deepen my technical expertise and maintain a balance with strategic acumen.

WORK EXPERIENCE

Infrastructure Engineer

MYDIGITAL ID (MKN, JPM) | INFRASTRUCTURE DEPT

Mar 2024 - Current | (Full - Time)

Hardware & Server Maintenance

- Assisted with physical infrastructure readiness for deployments (power/cabling validation, asset tracking, maintenance window coordination).
- Supported incident handling requiring DC involvement (hardware faults, connectivity issues, planned works) and coordinated escalation with relevant teams.

OS Administration (Ubuntu, Rocky Linux, Windows)

- Administered Linux servers (service operations via systemd, troubleshooting with journalctl, user/access administration, performance/stability checks).
- Managed storage and filesystem operations including /etc/fstab mounts, LVM administration, and recovery procedures (xfs_repair, fsck).
- Built and maintained Bash automation for operational tasks (health checks, service restart workflows, verification steps, housekeeping).
- Created and maintained runbooks/SOPs and system documentation to standardize support and reduce recovery time.

Cloud Infrastructure (TMCloud)

- Operated cloud infrastructure on TMCloud, supporting VM provisioning, scaling, lifecycle operations, and incident recovery.
- Managed cloud network controls (Security Groups/ACLs) to enforce least privilege connectivity between services and environments.
- Supported observability and troubleshooting using Checkmk, Grafana, and Kibana (alert triage, log validation, impact checks).
- Supported secure administration using OpenSSH and centralized identity management practices (LDAP) via shared home directory (AutoFS)

On-Prem Virtualization & Storage (Proxmox + Synology)

- Operated Proxmox virtual infrastructure (VM provisioning, templates/cloning, lifecycle management).
- Managed Proxmox networking: Linux bridges, VLAN tagging/trunking, segmentation for multi-environment connectivity.
- Administered Synology NAS for SMB/Samba + NFS services, permissions/ACL management, and access troubleshooting.
- Managed NAS continuity features: RAID/SHR, SMART/drive health monitoring, Snapshot Replication, and backup workflows (Hyper Backup / Active Backup for Business).
- Supported centralized home/workspace access via NFS/AFS (mount validation, permissions, availability troubleshooting).

Network & Security (Cloud + On-Prem)

- Diagnosed DNS and connectivity issues using dig/nslookup, ping, traceroute, ss, netstat, tcpdump.
- Administered Ubiquiti gateway + switching for segmentation and policy enforcement across core/distribution/PoE switching layers.
- Coordinated mydigital-id.my controls and validated public exposure routing via ALB/WAF as requested.
- Assists vulnerability scanning using Nessus and tracked remediation actions (patching/config, contributing to risk evidence and compliance alignment.

BADRUL AMIN HAIRUL KHOLIDIN

INFRASTRUCTURE ENGINEER

LANGUAGES

English : Professional working proficiency

Malay : Native or bilingual proficiency

AWARDS

Dean List UNIKL MIIT

GPA: 3.50 and above every semester.

College Outstanding Performing Award (COPA)

CGPA: 3.83 (Second Class Upper)

King Scout Malaysia 2015

The Scouts Association of Malaysia's highest honor. His Majesty the Yang di-Pertuan Agong of Malaysia and all of Malaysia's sultans have signed the King's Scout Certificate.

PROJECTS

Malware Analysis System

Cyber Security Malaysia — June 2023 – Dec 2023

- Collect trending Malware Information and monitors network traffic and collects suspicious malware activities.
- Provides insight by detecting the activity of advanced and sophisticated malware within a network.
- Utilize Elasticsearch engine and analytics platform, then perform Logstash to data processing pipeline, into a visualization using Kibana.

Halal Traceability & AEO Project

MIMOS BERHAD — Mar 2023 – Mar 2024

- Enhanced BAIM (Blockchain Application Integration Module) to effectively capture errors during downtime of the orderer from multiple hosts.
- Visualize using CheckMK and Grafana up to 20 VMs.
- Expertly maintain the shell script to automate the chaincode installation, docker, kubuernetes services.

REFERENCE

MYDIGITAL ID SB SDN BHD

MOHD SHAKIR BIN ZAKARIA
shakir.zakaria@mimos.my
Head of Infrastructure Service
012 2246069

Platform (Kubernetes)

- Supported Kubernetes platform operations by coordinating infrastructure readiness, connectivity requirements, and environment configurations for application deployments.
- Assisted with ingress exposure validation (Ingress/Service/LoadBalancer) and verified public routing through NLB/WAF where required.
- Supported operational checks for cluster health and workload stability (node/pod status, resource usage, event inspection) and escalated findings for remediation.

Data Center Support & Delivery

- Handled support tickets related to data center and backup support; provided onsite troubleshooting where required.
- Monitored infrastructure health, responded to incidents, and performed root cause troubleshooting to restore services and prevent recurrence.
- Supported project delivery by implementing changes safely with documentation (change planning, validation, rollback readiness) and cross-team coordination.
- Active contributor in internal security communities supporting **ISO/IEC 27001:2022** improvements and **NCII** initiatives, sharing inputs on risk assessment, controls, and operational security practices
- Led Disaster Recovery activities for an active-active environment, including readiness planning, validation, and recovery coordination to maintain continuous service availability.

Associate Researcher

MIMOS BERHAD | BLOCKCHAIN DEPT — Mar 2023 - Mar 2024 | (Full - Time)

- Liaise from different stakeholders and agencies to gather user requirement and project into documentation.
- Focused on mastering Hyperledger Fabric up to the latest version using (GIT) for Halal Traceability development and utilize AWS services for managing IAM, EC2 instance on cloud infrastructure.
- Delivered a generic middleware with a new signature endorsement policy for enhanced security.
- Design and deploy a new custom script to automate the installation chaincode for multi host Hyperledger Fabric.
- Participated in the development to establish an Intellectual Patent.
- Managed Ubuntu VM clusters across three on-premises locations, ensuring stable access, connectivity, configuration consistency, and infrastructure readiness.

Internship

MIMOS BERHAD | BLOCKCHAIN DEPT — Aug 2022 - Dec 2022 | (Full - Time)

- Proficient in developing decentralized applications using Hyperledger Fabric with Java, Golang, and Python languages,
- Design and develop of Halal Traceability and Authorized Economic Operator Systems, resulting in a remarkable 23% increase in overall development.
- Collaborated with government organizations and actively participated in creating and testing new software applications, fostering effective teamwork and enhancing software quality.
- Exploring in preparing UNIX shell scripts for daily production system testing and monitoring across multiple VM servers, ensuring smooth operations and proactive issue resolution.
- Demonstrated expertise in conducting Endorsement Tests and implementing Signature Policy for user authorization in blockchain projects, specifically contributing to the successful operation of the Vaccine Management System.

COMMUNITY ENGAGEMENT

UNIKL MIIT, Kampus Kota, Kuala Lumpur

- Event Coordinator for E-Sports Tournament Game — 29 Nov 2019
- Culture Fest - Chinese Civilization — 22 Nov 2019
- Mobile Apps Development With C# Workshop — 26 June 2021
- Laravel JomLearn — 22 - 23 Jan 2022
- UniKL Student Campaign by Google Developer — 20 - 23 May 2022
